

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM Radio's ability to provide the kind of programming that I demand and deserve. This Petition represents an anti-competetive stance on Radio in General. We are a society that has thrived on technical advancements to our life. It would be like limiting the ability for companies to offer e-billing, because it take profits away from the USPS.

Please allow our country to move forward in technology. If local broadcasters have a problem with it...I suggest they improve their product rather than limiting superior competition. It survival of the fittest not the weakest.

Thanks

Eric Christy
